Constructed of injection molded magnesium, the FM4000MAG is the next evolution in catchers masks. Magnesium is the perfect material for a mask with low density for extremely light weight (16.8 oz), high vibration damping properties, and very high durability. The bars are a bit thicker than our other masks, but have the same flattened profile and openings for outstanding visibility.

The FM4000's design is inspired by the MVP2500 & MVP4000 cages, which are known for offering great vision and deflective properties. The curved forehead bar allows more padding to come into contact with the catcher's skull cap making the mask more stable on a catcher's head to absorb more impact. Built with a lightweight hollow steel, this mask weighs in at just 17 ounces.

## Pro-Elite

If it ain't broke, don't fix it. That's what we hear from the pros. The exceptional leather and proven pattern make our Pro-Elite® mitts the choice of serious catchers. Our players remain loyal to our mitts because they choose the tools of excellence.

Our tan leather is more supple than our black leather. Our tan leather forms a great pocket and has a loud pop that pitchers love. The black leather on the back provides stability throughout the season.

Our solid black mitts have increased in popularity recently. The professional #focus team members tell us that pitchers are throwing harder each year.

There's been a big shift from our 33.5" mitt to our 34" size. Again, we hear from our #focus team that pitchers are not only throwing harder and faster but they have more movement. The small increase in size provides a little margin for error and perhaps some peace of mind.

## PRO-ELITE® BLACK & TAN PRO CATCHERS MITT

STYLE NO.	SIZE	COLOR
CM3000BT	35"	BLACK & TAN
CM3000SBT	33.5"	BLACK & TAN
CM3000XSBT	32"	BLACK & TAN

Exclusive Japanese tanned steer hide allows for fast break in and extended life. Only the finest materials and hand craftsmanship are used to make these exceptional mitts. The soft tan leather pocket allows for great feel and gives the ball that extra POP which pitchers love to hear. The black leather backing is stiffer, and gives the mitt the right amount of support and increases its life.

## PRO-ELITE® SOLID BLACK PRO CATCHERS MITT

STYLE NO.	SIZE	COLOR
CM3000BK	35"	SOLID BLACK
CM3000SBK	33.5"	SOLID BLACK

These solid black mitts are perfect for a player looking for a stiffer glove. Compared to the original black & tan CM3000 series, this glove features the stiffer black leather on both the inside and outside of the glove.

## PRO-ELITE® SOLID BLACK PRO CATCHERS MITT

STYLE NO.	SIZE	COLOR
CM3000MBK	34"	SOLID BLACK

In 2011 Martin Maldonado started his professional career using our small percie CM3000XSBK, our 32" mitt. Soon, Maldonado switched to our most popular 33.5" size. Now pitchers are throwing faster and with more movement. In the 2017 season Maldonado used a custom 34" mitt and won the Rawlings Gold Glove Award®. That year Maldonado sharpied 100% on the back of his web. It was his reminder to give 100% of the pitches his 100% attention and focus.

## PRO-ELITE® BLACK & TAN TRAVEL BALL

STYLE NO.	SIZE	COLOR
CM3000BTJR	31.5"	BLACK & TAN

With youth baseball becoming increasingly more skilled and competitive the need for properly sized, high-quality equipment has grown. As a result, the game's best catcher's mitt offering, All-Star's CM3000, is adding a true junior size. This 31.5" Pro-Elite™ model combines all the benefits of the larger sizes in a more appropriate fit for hard core youth players. Exclusive Japanese tanned steer hide delivers a fast, custom break-in with professional level durability, all wrapped up in the iconic black & tan colorway.

# BREAK THE VIRUS CHAIN

## Laundry/Equipment Rooms

## SURPRISE AF DISINFECTANT

A ready to use hospital grade disinfectant for athletic and recreational facilities, gyms, fitness studios, hospitals, nursing homes, healthcare facilities, schools, kitchens and bathrooms.

Hospital Grade:  
Virucide  
Germicide  
Disinfectant

Kills **99.9%** of  
Germs and Bacteria\*

**SURPRISE AF is on the CDC's list of equivalent cleaning agents that meet the EPA's criteria for use against SARS-CoV-2, the virus that causes COVID-19.**

In order to kill Coronavirus on hard surfaces, a disinfectant which is registered with the EPA on List N must be used. Product guidelines must be followed to ensure proper dwell time.

## NOT ALL DISINFECTANTS ARE CREATED EQUAL.

### WHY YOU NEED A HOSPITAL GRADE DISINFECTANT

Knowing the difference between sanitizing and disinfecting has always been a source of confusion in the marketplace. Distinguishing between the two and understanding which products you must use to eradicate viruses is extremely important to ensure a safe work environment.

Sanitizers are used to reduce the number of germs on surfaces or objects to a level considered safe by public health standards or requirements. Sanitizing kills most germs but not all of them, and has no affect against viruses and fungus.

Disinfectants are effective against bacteria, fungi and viruses and must list every organism claimed to be killed in order to meet EPA regulations. **SURPRISE AF is a hospital grade disinfectant which is on LIST N of the EPA. Only a disinfectant registered with the EPA on List N is recognized as being able to kill Coronavirus on hard surfaces.**

### REMEMBER TO CLEAN WHERE NEEDED BEFORE YOU DISINFECT.

Cleaning with soap or detergent and water reduces germs, dirt, and impurities by removing them from surfaces or objects. Dirt and organic material make some disinfectants less effective, so cleaning is necessary sary before disinfecting in most cases.
