ALL-STAR®

Tools of ignorance they say. Not on our watch. We have the most skilled minds in the industry making sure you have the most intelligent gear in the game. Precision is our passion and pros choose All-Star® not out of ignorance, but experience. When you experience the precision of the legendary CM3000 in your hand, our patented LINQ™ system on your knee, or the care-free fit of our Delta Flex™ Harness you experience what the pros wear.

We know when you're behind the plate grinding away at the game, the game grinds away at you. Catching ain't easy - thumb jams, foul ball mask impacts, wrist and forearm blocks, back swings, home plate collisions... you name it, this position hurts. Oh and the squatting... so much squatting. And yet with all these distractions you get out there, you champion the field, and lead the team. Since 1960 we've been grinding away

too, pioneering the protective equipment, from T-Ball to Pro-Ball, that keep you in the game.

We might not be the first brand you try, but as your skills move forward and your backstop journey rises above, All-Star is here to make sure you're protected in intelligence.

INTRODUCING

MVP-PRO

The game is changing. Catchers must adapt and so should their gear. Pitchers are throwing harder with more movement. The wild pitches are getting wilder (not to mention the backswings). Catchers equipment must provide confidence to react without question or distraction. Unrestrained, secure, and of course protected.

All eyes look to All-Star® for innovation in catchers protection. Over 60 years of product innovation, collaboration with pro players, designers, engineers, and independent test labs has led us to the MVP-PRO™ kit. This gear is our

sign to the baseball world that we have entered a new era in catching.

Catchers are facing bat and ball impacts from all angles. The MVP-PRO™ Helmet is the choice of most professional catchers because it has Deflexion™ shock hammocks that disperse energy from direct impacts. The I-BAR BSP™ Cage provides back swing protection for coverage against wild swings.

The MVP-PRO™ Chest Protector is designed to help you adapt to the evolution of the catcher position so

you can be faster, more protected, and secure even the wildest pitches. Our new 3DU Bar™ technology increases the blocking area by 50% enabling you to keep everything in front.

The MVP-PRO™ Leg Guards are specifically designed for the 1KD (One Knee Down) stance. It's about time catchers had gear that provided the added flexibility to work the zone and increase their responsiveness. Our brand new revolutionary SHIFT™ technology moves with you to cover more of the thigh for better 1KD protection.

REESE MCGUIRE
PRO, BOSTON

MVP-PRO 

All-Star® teamed up with our pro catchers to create game changing protection and performance in the MVP-PRO Series kit, the most innovative set of gear ever made. The catcher position will never be the same.

1 DEFLEXION

All-new Deflexion™ technology is made of durable TPR Shock Hammocks placed along the forehead and chin to isolate your dome from direct impacts. Its ability to absorb and displace unwanted energy on impact is revolutionary.

2 I-BAR-BSP™

Back Swing Protection™ (BSP) can now be found on the All-Star® MVP-PRO Helmet. With the evolution of the swing-path, back swings are a serious threat to player safety. Our next generation cage is designed to extend past the ear for protection against unintended impacts.

3 3D AIRMESH

Interior laser cut foam panels and oversized 3D Airmesh padding reduce weight and dramatically increase ventilation.

4 3DU BARS

The revolutionary new 3DU Bar™ technology increases the blocking area by 50% to keep blocked balls within arm's reach. Tough bounces to the sides that would normally result in the ball getting away are instead redirected by the 3DU Bars so you can recover the ball and keep runners from advancing.

5 DELTA FLEX™

The completely redesigned Delta Flex™ harness system ensures a firm yet breathable fit with maximum mobility.

6 CON4M™ FIT TECH

CON4M™ Fit Tech features formable collarbone protection.

7 SHIFT™

Interior padding stays connected to your thigh while an exterior shield moves with you to cover more of your thigh for better 1KD protection.

8 LINQ X™

The next generation LINQ X™ pivoting hinge system allows a player to strap them on and completely forget about them while blocking, throwing, and running. The interlocking knee and thigh components offer specialized coverage for the areas exposed in the 1KD stance. The hinge design rotates with your knee through the entire range of flexion for uncompromised fit and security.

9 DELTA FLEX™

Innovative Delta Flex™ calf harnesses (no more strap strain!) clip directly to the leg guard for the most secure and comfortable leg guard in baseball history.

10 CON4M™ FIT TECH

The demands of the one knee down stance require the ability to adjust the length of individual leg guards. CON4M™ allows you to customize the shin length between 16.5" - 17.5" for the perfect fit.

11 CON4M™ FIT TECH

The CON4M™ system also features direct connect straps for a tight low-profile fit.

Pro-Elite

If it ain't broke, don't fix it. That's what we hear from the pros. The exceptional leather and proven pattern make our Pro-Elite® mitts the choice of serious catchers. Our players remain loyal to our mitts because they choose the tools of excellence.

Our tan leather is more supple than our black leather. Our tan leather forms a great pocket and has a loud pop that pitchers love. The black leather on the back provides stability throughout the season.

Our solid black mitts have increased in popularity recently. The professional #focus team members tell us that pitchers are throwing harder each year.

There's been a big shift from our 33.5" mitt to our 34" size. Again, we hear from our #focus team that pitchers are not only throwing harder and faster but they have more movement. The small increase in size provides a little margin for error and perhaps some peace of mind.

Exclusive Japanese tanned steer hide allows for fast break in and extended life. Only the finest materials and hand craftsmanship are used to make these exceptional mitts. The soft tan leather pocket allows for great feel and gives the ball that extra POP which pitchers love to hear. The black leather backing is stiffer, and gives the mitt the right amount of support and increases its life.

In 2011 Martin Maldonado started his professional career using our small precise CM3000XSBK, our 32" mitt. Soon, Maldonado switched to our most popular 33.5" size. Now pitchers are throwing faster and with more movement. In the 2017 season Maldonado used a custom 34" mitt and won the Rawlings Gold Glove Award®. That year Maldonado sharpened 100% on the back of his web. It was his reminder to give 100% of the pitches his 100% attention and focus.

S7 Elite

The S7-Elite™ and Pro-Elite™ mitts are designed for the highest level of play – but they are vastly different from each other. The largest difference is the pattern developed for the S7-Elite™ which has a deeper pocket.

The S7-Elite™ is for the older and more serious player who prefers a deeper/

more secure pocket. The web lacing runs vertically for out-of-the-box strength. It is constructed with strong Japanese Tanned steerhide, a classic conventional wrist closure, a finger pad, and tapered fingers for reduced weight.

CMW-PHX

Two years of development time was spent on this Paige Halstead x All-Star® catchers mitt. We started from the ground up – analyzing the catching position and the good, bad, and ugly of softball catching mitts in the industry. Core to Paige's personality, she wanted a legit glove that would be built to last and hold up to the constant demand placed on catchers. The final result is an *amazing* professional softball mitt with several industry firsts.

DESIGNED FOR ALL HANDS WITH GLOVELOCKS™

We hear it all the time: wrist closures don't stay tight enough. We developed a very simple solution that allows this mitt to fit the smallest to the largest hands. Simply pull two rawhide laces as tight as you need – then, *GET LOCKED IN!* with the included GloveLocks™.

POCKET ADJUSTABILITY

With two simple lace adjustments, the depth of the pocket can be easily customized. Controlling the ball with security is the key especially with today's pitchers spinning the ball like never before. This mitt allows any catcher to set the pocket depth she prefers before the first catch and even with each pitching change. This innovation also helps eliminate ball drops while breaking in the mitt.

Constructed of injection molded magnesium, the FM4000MAG is the next evolution in umpire masks. Magnesium is the perfect material for an extremely light weight mask (16.8 oz), high vibration damping properties, and very high durability. The bars are a bit more bladed than our I-Bar Vision™ steel masks for outstanding strength and visibility. Over 16% of professional umpires choose All-Star magnesium.

HARD SHELL UMPIRE CHEST PROTECTOR

STYLE NO.	SIZE	COLOR
CPU5000	12.5" - without extension	M.BK ONLY

Cobalt™ low profile, contoured hard shell Umpire Chest Protector. 3.7mm thick HDPE pre-curved armor plates with hinges conform to many body shapes. All armor plates have memory – bend them to form a custom shape. Shoulders guards can move outward by 1/2 inches for larger Officials. Removable shoulder gap cap for an even lower profile fit. Patented central cooling channel with removable and washable chest pads (or swap in a second dry set for long tournament series). The original DeltaFlex™ harness with hook ups located in front for easier on/off. Weight = 2.7 lbs and 3.3 lbs with extension.
